STEFIN JAMES

FULL STACK SOFTWARE DEVELOPER | WEB APPLICATIONS & BACKEND SERVICES

Thiruvananthapuram, Kerala · Open to Relocation · +91 80895 52485 · stefinjames1@gmail.com
linkedin.com/in/stefin-james-6355723aa · github.com/Ste30-coder

PROFESSIONAL SUMMARY

Full Stack Software Developer with hands-on experience designing and implementing responsive user interfaces, secure REST APIs, database schemas and business logic for production web and mobile applications. Skilled in JavaScript, TypeScript, React, Next.js, Node.js, SQL, PostgreSQL and MongoDB. Experienced in turning business requirements into reliable features, improving application performance, debugging integrations and collaborating with engineers and stakeholders. B.Tech in Computer Science & Engineering (AI & ML).

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, HTML5, CSS3, React, Next.js, React Native, Tailwind CSS, responsive interfaces, state management

Backend & APIs: Node.js, Express.js, RESTful services, JSON, business logic, JWT authentication, RBAC, Zod validation, webhooks, Socket.IO

Databases: SQL, PostgreSQL, MySQL, MongoDB (NoSQL), relational schema design, table relationships, queries, indexing, Drizzle ORM, Prisma

Quality & Delivery: Git, GitHub, Postman, debugging, application security, code refactoring, test generation, Docker, CI/CD (GitHub Actions), Agile-style iterative delivery

PROFESSIONAL EXPERIENCE

Software Developer | Meantr Software, Thiruvananthapuram | Apr 2026 – Present

- Develop and maintain Next.js and TypeScript web applications for customer, B2B, partner, sales and administrator workflows, integrating UI controls with backend services.
- Implement business-critical features covering Razorpay payments, webhook confirmation, GST billing and server-side authorization for 9 user roles.
- Design and maintain application data flows for a 57-table PostgreSQL schema; connect frontend features with approximately 200 REST API routes.
- Develop a services marketplace with React Native, Node.js, Express and MongoDB, including API endpoints, location search, real-time chat and notifications.
- Translate client requirements into UI screens, API logic and data models; coordinate with senior backend engineers, demonstrate iterations and resolve integration defects.

SELECTED PROJECTS

Invigro — Multi-Portal Commerce Platform | Next.js, TypeScript, PostgreSQL, Drizzle ORM

- Built functionality across five portals in a shared application; delivered secure checkout, order management, role-based data access and webhook-based payment processing.
- Improved client-side responsiveness by organizing application state into 7 focused Zustand stores and limiting unnecessary updates on complex screens.

Services Marketplace — Mobile, Web & API Platform | React Native, Express, MongoDB

- Developed 33 mobile screens, 9 admin views and 80 REST API endpoints; used MongoDB geospatial indexes for location search and Socket.IO for real-time messaging.
- Applied JWT authentication, resource-ownership checks and request validation to improve API security and maintainability.

Academic Engineering Projects | Python, Flask, scikit-learn, XGBoost, YOLOv8

- Built a machine-learning phishing URL detection REST API and a real-time animal detection and alert system, practicing modular development and asynchronous processing.

EDUCATION & TRAINING

B.Tech — Computer Science & Engineering (AI & ML) | APJ Abdul Kalam Technological University | 2021–2025

Python Full-Stack Development Programme | Quest Innovative Solutions, Kochi | Jul 2025–Mar 2026; Django, Flask, Angular, RxJS
